Art Unit: 1755

The following is an examiner's statement of reasons for allowance:

U.S. patent 6,960,309 is cited as of interest since it claims a phosphor having the formula  $Ba_{1-x}Eu_xMgAl_{10}O_{17}$  where x is 0.03-0.25 and a quadrivalent element substitutes for Al or Mg in the phosphor. There is no interference since the europium activated barium magnesium aluminate phosphor genus of claims 1-15 of this application does not suggest the  $Ba_{1-x}Eu_xMgAl_{10}O_{17}$  where x is 0.03-0.25 specie claimed in the patent, for the purposes of determining an interference. In addition, there is nothing in the claims of this application indicating that the silicon, zirconium or hafnium dopant partially substitutes for only Mg or Al in the phosphor. The specification teaches these dopants substitute for some of the cations in the phosphor which means Eu, Ba or combinations of cations can be partially substituted as well as Mg and Al. This generic teaching does not suggest the specie claimed in the patent, for the purposes of determining an interference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melissa Koslow whose telephone number is (571) 272-1371. The examiner can normally be reached on Monday-Friday from 8:00 AM to 3:30 PM.
